APPLICATION FUNCTIONS

## ABOUT THE USER MANUAL

The user manual serves as a guide that provides the user on how to use the app and the available features that is offered.

## ABOUT THE APPLICATION

IsTourney is a mobile application that allows you to view different tourist spots, tour guides, and book a schedule with your selected services. The application also allows tour guides to post and show their tour guiding services within the app to allow tourist to view them. Use your mobile phone to easily access and book different tour guides within Baguio City without the hassle of having to go out and find them.

## HOW IT WORKS

IsTourney is a mobile application that has 3 kinds of users (admin user, tour guide user, and tourist user). It has different interfaces for each user and different functionalities. For instance, the Admin interface prompts login or sign up. There are three implemented interfaces for bottom navigation for the Admin. After signing up or logging in it navigates directly to the Home Page of the admin where the tourist spots are displayed. The right side of the Home page is the Add interface where the Admin uploads new images for tourist spots. The left side of the Home page is the Profile Page for Admin where it prompts the user to fill in all the fields displayed. It let the user update their profile, delete their profile, or log out
